

HEALTH LEDGER

The HHS-Backed
Blockchain Solution
for Transparency
and Accountability

A secure, blockchain-powered system designed to eliminate fraud, waste, and abuse in federal health grants, ensuring every dollar is tracked, verified, and properly spent.

THE PROBLEM

BILLIONS LOST TO FRAUD, WASTE, AND LACK OF OVERSIGHT

The U.S. has a health crisis, but billions are lost each year to fraud and mismanagement in Medicare, Medicaid, and ORR grants. Fake providers, lack of oversight and false claims drain funds meant for real care.

Life expectancy falls, chronic diseases rise, and millions can't afford care.

\$50.3 billion in improper Medicaid payments (FY 2023).

Over \$3.4 billion lost annually to healthcare fraud.

\$22 billion in ORR migrant aid grants with little accountability.

Weak Tracking and Slow, ineffective fraud recovery - ROI on fraud prevention is just 1.4x the spending.

THE SOLUTION

HEALTH LEDGER

HEALTH LEDGER is a blockchain-powered financial control system that tracks every grant, payment, and transaction in real time.

Built on the HEALTH blockchain, it prevents fraud, ensures compliance, and enables instant audits across federal health programs.

By enforcing transparency and accountability, it supports MAHA's mission to direct funds to real patients, reduce waste, and improve national health.

IMMEDIATE BENEFITS

Eliminates fake providers, fraudulent claims, and misappropriated funds.

Boosts fraud recovery ROI from 1.4x to 10x+ by stopping fraud before it happens.

Saves taxpayers billions in wasted healthcare funding.

Restores Trust: Ensures funds reach real patients, providers, and vulnerable communities.

WHY NOW?

Aligns with MAHA's Mission: Supports Make America Healthy Again in ensuring transparent, efficient healthcare funding.

Proven & Ready: Built on HEALTH blockchain & Hyperledger Fabric (HLF), trusted by HHS, FDA, and global institutions.

Zero Bureaucratic Delays: Immediate deployment with HHS & CMS system compatibility - no legislative roadblocks.

Scalable Beyond Healthcare: Future applications in education, disaster relief, and welfare programs.

THE MISSION

STOPPING FRAUD, PROTECTING TAXPAYERS, AND ENSURING EVERY DOLLAR COUNTS

HEALTH LEDGER supports the Make America Healthy Again Commission by ensuring healthcare funds are spent efficiently, lowering costs and improving outcomes. By eliminating fraud and mismanagement, it redirects wasted funds to real patient care, restoring public trust.

Built on the HEALTH blockchain, **HEALTH LEDGER** makes every transaction trackable and secure, preventing fake claims and fund theft. With real-time oversight, it ensures taxpayer money goes to healthcare, not corruption.

HOW IT WORKS

MAHA-Backed Transparency

Ensures accountability, eliminates waste, and empowers the MAHA Commission to oversee federal healthcare funds in real time.

Immutable Smart Contracts Prevent Fraud

Funds only release when services are verified, stopping fraudulent billing, kickbacks, and duplicate payments.

Real-Time Tracking

Every transaction is permanently recorded and visible to HHS, DOJ, and CMS. QR codes and biometrics ensure aid reaches real beneficiaries.

Instant Oversight

Every grant and transaction is tied to a responsible official, cutting fraud detection time from months to minutes.

Seamless Integration

Connects Medicaid, Medicare, ORR, and NIH grant systems for full-scale fraud prevention.

THE ASK

1

Mandate HEALTH LEDGER for all major federal healthcare grants.

2

Integrate with DOJ, HHS, CMS, and ORR immediately for real-time fraud prevention.

3

Enforce agency and judicial oversight to ensure transparency and accountability.
