VOTE

Powered by $GALA and $OSMI

Verified, Open, Transparent Elections

Restoring Election Integrity with Blockchain, AI & Real-time Verification

THE PROBLEM

AMERICA'S ELECTIONS ARE BROKEN - CONFIDENCE IS AT AN ALL-TIME LOW

Voters can't verify their own ballots, relying on outdated, exploitable systems.
Fraud fears and insecure machines have shattered trust.

No Fraud Checks
Fake, duplicate, and non-citizen votes slip through.

Mail-in & Voter ID Risks
Untracked ballots create doubt.

Bad Voter Rolls
Dead and ineligible voters remain listed.

Unsecure Machines & Opaque Counting
Hacking risks and unexplained vote spikes erode trust.

Weak Verification
Loopholes allow non-citizen and fraudulent votes.

THE SOLUTION

A BLOCKCHAIN-BASED VOTING SYSTEM

America Deserves Elections It Can Trust—Here's How We Fix Them A secure, fraud-proof voting system powered by $GALA and $OSMI, ensuring every vote is verified and auditable.

Secure
Votes are encrypted and tamper-proof.

Transparent
Every vote is recorded on a public blockchain

Private & Verifiable
Voters can confirm their vote without revealing it.

AI-Powered
AI prevents fraud and verifies identities.

Securing Elections with Full Transparency

Tamper-Proof Blockchain
Secures votes, ensures audits, and keeps choices private.

Proven Tech
Built on Hyperledger Fabric (HLF), trusted by HHS & FDA.

AI Identity Verification
Confirms voters without exposing personal data.

Real-Time Counting
Instant public updates, no late-night dumps.

Why VOTE & why now?

Elections Are Broken
Fraud, mail-in ballot issues, and non-citizen voting shattered trust in 2024. We can't afford the same in 2028.

Ready to Use
No new laws needed - start with absentee & overseas voters.

More Than Federal Elections
VOTE can secure state, local, and even corporate voting systems.

Why VOTE is a game-changer

Prevents Fraud
Encrypted votes stop tampering.

Verifies Voters
AI ensures only legal citizens can vote.

No Hackable Machines
Secure digital & paper ballots.

Ends Counting Chaos
Live tracking, no sudden spikes.

Restores Trust
Voters verify their own ballots - no blind faith required.

HOW IT WORKS

Voter Registration
Verify ID through government records or biometrics.

Casting Your Vote
Submit a secure, anonymous ballot online or in person.

Recording Your Vote
Votes are encrypted and stored on blockchain.

Verify Your Vote
Voters get a receipt to confirm their vote was counted.

Results in Real-Time
Votes are publicly verifiable in real time, no recount delays.

Note: Anyone can audit voting totals

THE ASK

LET'S MAKE ELECTIONS TRUSTWORTHY AGAIN

1 Pilot Blockchain Voting
Start with overseas and absentee voters.

2 Expand Nationwide
Make blockchain voting an option nationwide.

3 Legislative Support
Push for laws to secure all elections.
